## BEWARE OF PHONY BLEACHER BIDS

We build our benches & bleachers to the highest standards. Listed below are some of the differences by others who may be listing their benches & bleachers as comparable to ours.

- Frames - Ours are 100% aluminum angle. Be careful of those quoting "galvanized, steel angle iron" as equal.
- Seat Planks - Ours are 100% anodized aluminum with a minimum wall thickness of .078. A thinner walled unit does not have the strength or support.
- Foot Planks - Ours are 100% Mill Finish Aluminum. Be careful of those quoting steel foot planks. They could rust out & will need to be replaced.
- End Caps - Ours are constructed of fiber reinforced polypropylene. No sharp edges to snag clothing or skin.
- Indoor Use - Our Tip N' Roll units come with rubber leg protectors so they can be used indoors or out. Be careful of those units using steel vs aluminum. In a "tip-over" fashion, steel could damage your gym floor or cause personal injuries.

#### PREFERRED BLEACHERS WITH FENCING

- Preferred bleachers feature DOUBLE FOOT BOARDS on all rows for added safety
- Frames are 100% welded aluminum angle
- Bleachers include aluminum vertical picket guardrail system. Pickets are welded for faster and easier installation.

- Features 2" x 10" anodized aluminum seat planks and 2" x 10" mill finished foot planks
- Safety end caps - no sharp edges to snag clothes or skin
- Some assembly required

Due to constantly changing specifications, please check local building and safety codes to ensure bleacher compliance.

**Don't be fooled by a low price. Our manufacturing team has been in this business for 30 years. If you see bids or quotes that "seem too good to be true" - they are. Respectable manufacturers purchase aluminum at the same prices. Anyone offering to deliver product at 30% less is not matching specs.**

- Front Rows - Be very careful to know the exact height of each seat section and the overall units. Some makers cut as much as 6" off every seat height to save money and lower their bids. This puts the first row approximately 11" above ground level.
- Back & Side Fencing - We use 9 gauge wire and heavy duty fence pipe that is attached to the bleacher using heavy duty aluminum angle and channel. Anything less is asking for mechanical and safety problems.

## TIP N' ROLL BLEACHERS

- Tip N' Roll bleachers are perfect for auxiliary seating requirements.
- Unit easily tips up on its casters for convenient storage
- Frames are 100% welded aluminum angle
- Seat planks are either anodized or powder coated (where applicable)
- High grade swivel casters & rubber foot pads will not mark your floors
- Standard models include single foot planks
- Preferred models include double foot planks
- **WARNING:** These lightweight units are easily tipped up for rolling by any responsible adult. However, if tipped up outdoors; extreme caution should be taken in windy conditions. Multiple adults may be required to control the unit.

Due to constantly changing specifications, please check local building and safety codes to ensure bleacher compliance.
